Windows app for any flatbed scanner. Free trial, no card needed.

GrailCrest™

What it tells you about a card

1. **Centering, corners, edges and surface**
   Measured on your scan, in millimetres, not guessed by eye.

2. **The grade it should come back with**
   PSA, Beckett and CGC estimates, with the odds of each grade.

3. **Whether grading is worth the fee**
   What it sells for raw and at each grade, and what you'd keep after every fee.
